No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                               783

Hashimoto O., Tatsumi M.;

Submitted (FEB-1997) to the EMBL/GenBank/DDBJ databases.

I- FUNCTION: Accessory protein for MHC class-II antigen/T-cell receptor interaction. May regulate T-cell activation.

I- SUBURIT: Associates with p56-lck (By similarity).

I- SUBURLICULAR LOCATION: Type I membrane protein.

I- SUBCELLULAR CONTAINS 3 immunoglobulin-like C2-type domains.

I- SIMILARITY: Contains 3 immunoglobulin-like V-type domains.

",
Mol. Biol. Evol. 15:892-900 (1998).

-I- FUNCTION: Accessory protein for MHC class-II antigen/
receptor interaction. May regulate T-cell activation.
-I- SUBUNIT: Associates with p56-lck (By similarity).
-I- SUBUNIT: Associates with p56-lck (By similarity).
-I- SUBCELLULAR LOCATION: Type I membrane protein.
-I- SIMILARITY: Contains 3 immunoglobulin-like C2-type dom

Eur. J. Immunol. 22:2973-2981(1992).
-!- FUNCTION: Accessory protein for MHC class-II antigen/T-cell receptor interaction. May regulate T-cell activation.
-!- SUBUNIT: Associates with p56-lok (By similarity).
-!- SUBCELIULAR LOCATION: Type I membrane protein.
-!- SIMILARITY: Contains 3 immunoglobulin-like C2-type domains.
-!- SIMILARITY: Contains 1 immunoglobulin-like V-type domain.
                                                                                                                                                                                                                DOMAIN

FUNCTION: Accessory protein for MHC class-II antigen/receptor interaction. May regulate T-cell activation. SUBUNIT: Associates with p56-lck (By similarity). SUBCELLULAR LOCATION: Type I membrane protein. SIMILARITY: Contains 3 immunoglobulin-like C2-type dom SIMILARITY: Contains 1 immunoglobulin-like V-type Immunoglo
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                GO:0007169; P:transmembrane
